EXPERIENCE

Xperate, Pune   Feb-24-current
Software Developer

- Developed and maintained website features and resolved bugs in both frontedfrontend (Ember.js) and backend (PHP), utilizing SQL Server for database management.
- Managed manual deployment of the project on Microsoft Azure, ensuring smooth operation in the testing environment, and maintained comprehensive records using Excel.
- Learned the use of Pipeline and Releases and implemented versioning of the project using tags.
- Customized and redesigned the application according the the mobile view.
- Wrote and optimized SQL scripts to enhance database performance and integrity.

Nice Systems, Pune   2022-2023
Summer Intern

- Learned about Github Actions and use of Workflows.
- Designed and developed automated workflows using GitHub Actions to test various code types, ensuring 100% test coverage.
- Engineered YAML workflows to test XML and other file extensions, reducing manual testing time by 50%.

Projects

Digi-Mess

- Digitalize the paperwork of the mess system to provide easy access to information for both owners and customers.
- Creating a more convenient way to store and display data, enhancing efficiency and accessibility.

FoodForGood

- A platform that allows people to provide information about leftover food, enabling those in need to access it.
- The website serves as a medium for connecting individuals with NGOs and food centers.
